THE ANALYTICS THESIS

One analytics view across the financial journey

One interactive Power BI analytics solution connects the customer journey from activity to action.

Customers

Unifies the customer view.

Transactions

Tracks activity and value.

Bill Payments

Shows payment mix.

Investments

Explains contribution.

Customer Support

Surfaces friction.

Better decisions

Turns patterns into action.

Made with GAMMA

THE PROBLEM

Financial data is spread across several business areas

Activity is split across customer, transaction, payment, investment, and support reports.

The opportunity: combine the view, track performance, spot customer patterns, and flag where to act.

Transaction value

Bill mix

Investment contribution

High-value customers

Support issues

Resolution rate

Made with GAMMA

FROM DATA TO DECISIONS

From raw sources to business action

Each stage turns a fragmented financial environment into a decision-ready analytics solution.

Multiple data sources

Power Query data cleaning & transformation

Dimension and fact data model

DAX measures & KPI calculations

Power BI dashboard development

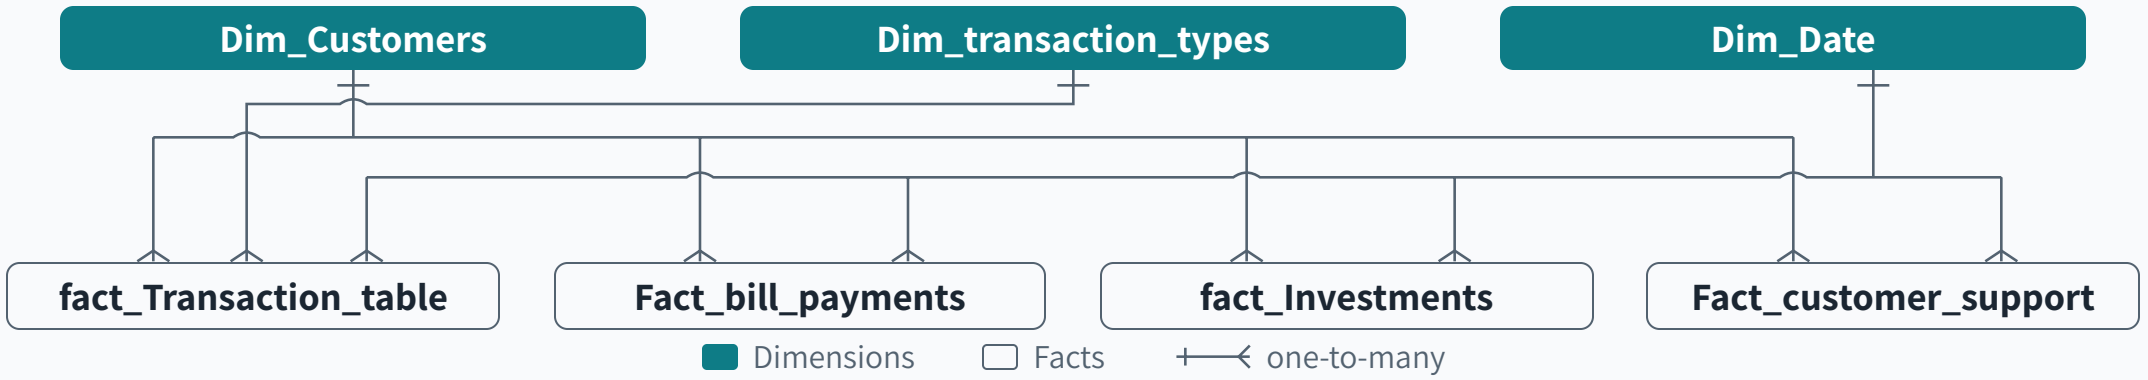

Business insights

Recommendations

Made with GAMMA

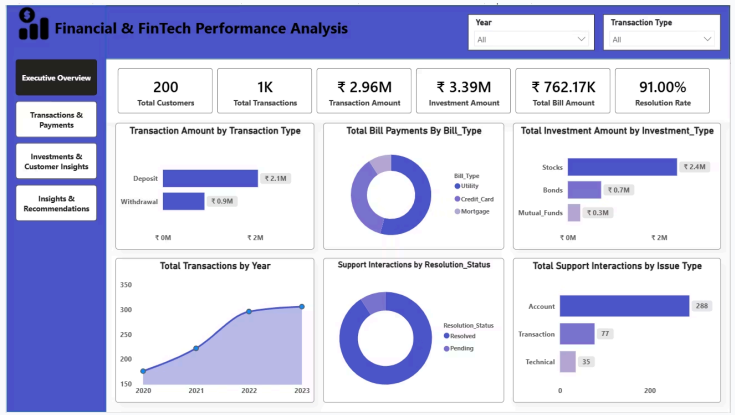

A star-style model connects activity to customers and time

Dim_Customers connects customer activity across transactions, bill payments, investments, and support. Dim_Date enables time-based analysis; one-to-many relationships support consistent slicing.

Made with GAMMA

The dashboard turns model outputs into a decision surface

TOTAL CUSTOMERS

200

TRANSACTIONS

~1K

TRANSACTION AMOUNT

₹2.96M

INVESTMENT AMOUNT

₹3.39M

TOTAL BILL AMOUNT

₹762.17K

SUPPORT RESOLUTION RATE

91%

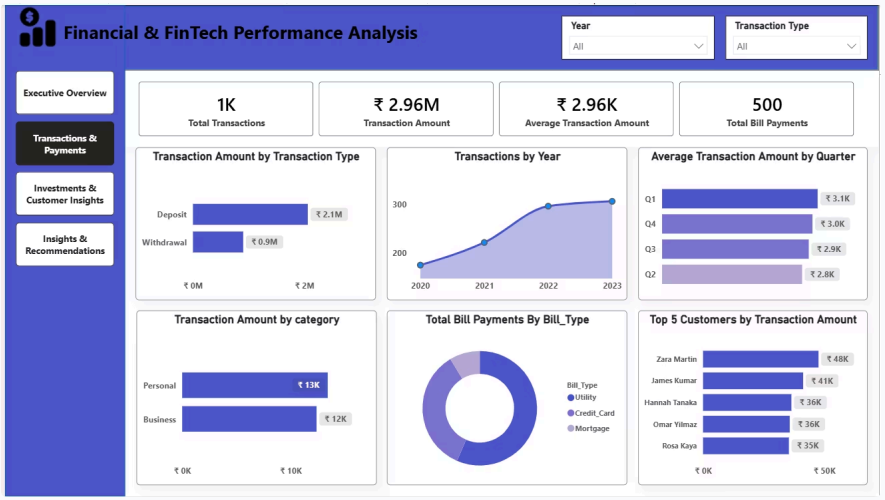

Made with GAMMA

TRANSACTIONS & PAYMENTS

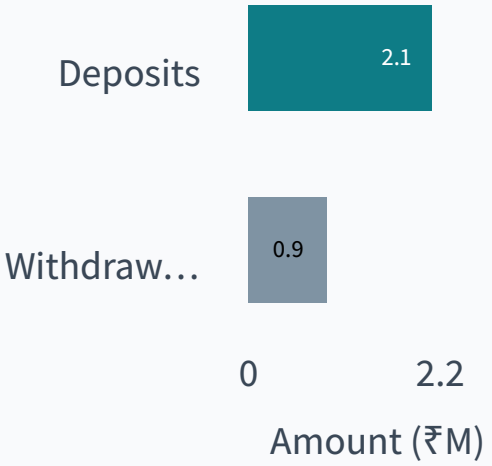

Deposits lead value as transaction activity accelerates

Deposits contributed approximately ₹2.1M versus around ₹0.9M from withdrawals.

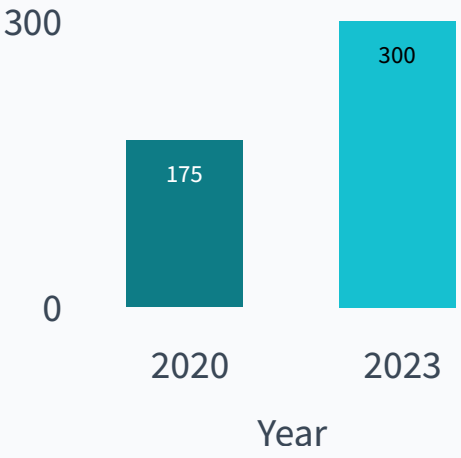

Transaction activity increased from approximately 175 in 2020 to over 300 in 2023.

TRANSACTION VALUE BY TYPE

ACTIVITY ACCELERATION

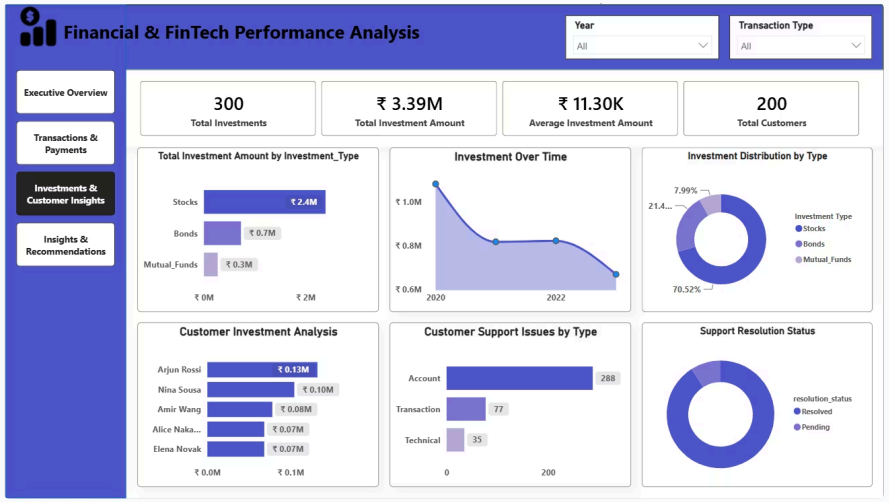

Made with GAMMA

INVESTMENTS & CUSTOMER INSIGHTS

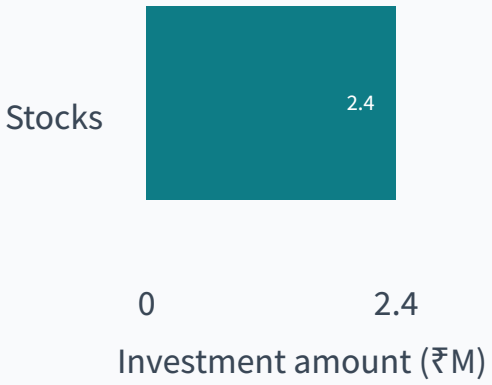

Stocks dominate investment value while support friction concentrates in accounts

₹3.39M total investment amount. Stocks contributed approximately **₹2.4M** and represented around **70.52%** of investment distribution.

Investment activity declined from approximately ₹1.1M in 2020 to around ₹0.66M in the latest period shown.

INVESTMENT VALUE

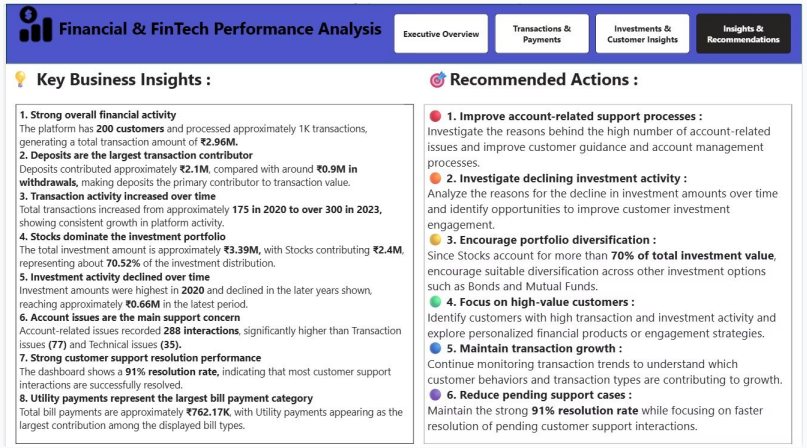

288

Account-related support interactions, the largest support concern.

Made with GAMMA

INSIGHTS → ACTIONS

Insights become a focused action plan

Key insights

Strong financial activity. Deposits lead transaction value; transaction volume is growing.

Stocks dominate the portfolio

Investment activity is declining

Account issues are the largest support concern

Recommended actions

Improve account support processes

Investigate declining investment activity

Encourage diversification; engage high-value customers

Maintain transaction growth; reduce pending cases

Made with GAMMA

THE REPEATABLE SYSTEM

A repeatable analytics workflow supports better decisions

Multiple Data Sources → Data Preparation → Data Modeling → DAX → Interactive Dashboard → Business Insights → Recommendations

This project demonstrates how Power BI can transform multiple financial datasets into a structured analytics solution that supports data-driven business decisions.
